

REMARKS

In response to the Examiner's objections to the drawing, the applicant amends the errors in the Brief Description of the Drawings. Fig. 11 is the present invention and Fig. 12 is the prior art.

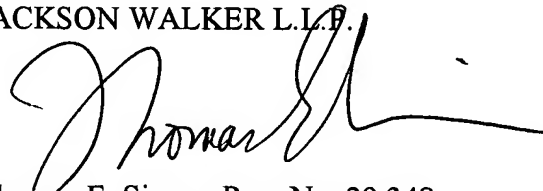

In response to the Examiner's objections to claims 13-19, the applicant renumbered claims 13-19 to claims 12-18.

In response to the Examiner's rejections to claim 1, the applicant incorporates claim 2 into claim 1 to become the amended claim 1. Because the cited prior art fails to disclose an opaque layer, the amended claim 1 should overcome the rejections under U.S.C. 102(e) and U.S.C. 103(a). Furthermore, claims 4, 6, 8, and 10, and amended claims 13, 15, and 17 (original claims 14, 16, and 18) directly or indirectly dependent on the amended claim 1 also overcome the rejection under U.S.C. 103(a).

The applicant believes that the foregoing amendments overcome the reasons for rejections and the objections to the referenced application, and thus early approval of the referenced application is earnestly solicited.

Respectfully submitted,

JACKSON WALKER L.L.P.

A handwritten signature in black ink, appearing to read "Thomas E. Sisson", is written over the printed name.
